Professional Summary

Computer Science Engineering student and RHCSA-certified Linux professional with a strong foundation in systems, infrastructure, and cloud technologies. Passionate about building reliable, scalable, and automated systems while continuously exploring modern infrastructure practices. Interested in Cloud Engineering, DevOps, Infrastructure Automation, and Open Source development, with a strong focus on practical learning and continuous technical growth.

Technical Skills

- **Cloud:** AWS (EC2, S3, VPC, IAM, RDS, CloudFront, ALB, Auto Scaling, CloudWatch), Azure, GCP
- **DevOps:** Docker, Podman, Git, GitHub Actions, CI/CD Fundamentals, Containerization, AWS CLI
- **Linux & Systems:** RHEL/CentOS, User & Group Management, Permissions, systemctl, Storage, Networking, firewall, SSH, Log Analysis
- **Programming & Scripting:** Bash/Shell, JavaScript, Node.js, Python (Basics), C/C++, React.js
- **Networking & Open Source:** TCP/IP, DNS, HTTP/HTTPS, VPC Networking, Security Groups, Open Source Development, GitHub Collaboration, Community Contributions

Certifications

Red Hat Certified System Administrator (RHCSA) — Score: 270/300

Aug 2025

Credential ID: 260-017-439 — MIT-Red Hat Training Division, Chhatrapati Sambhajinagar (Virtual)

Experience

Technical Support Engineer Intern
Global IT Providers

Jul 2026 – Present
Remote

- Provide technical support and troubleshoot Linux, system, networking, and application-related issues in a remote environment.
- Apply cloud-native architecture and infrastructure concepts to understand, diagnose, and resolve technical issues.
- Work with system administration, troubleshooting, and infrastructure technologies while gaining practical experience in enterprise IT environments.

Projects

Production-Ready CRUD Application Deployment on AWS [\[GitHub\]](#)
Docker, CloudWatch

AWS EC2, ASG, ALB, RDS, ECR,

- Deployed a Dockerized Node.js CRUD application on Amazon EC2 using an Application Load Balancer for high availability and traffic distribution.
- Configured an Auto Scaling Group with CloudWatch policies to automatically scale EC2 instances based on CPU utilization.
- Integrated Amazon RDS MySQL as the backend database and managed container images through Amazon ECR with secure environment configuration.

InfraSense – AI-Powered Cloud Infrastructure Recommendation Platform [\[GitHub\]](#)

[\[Live Demo\]](#)

React.js, Node.js, Docker, AWS, Azure, GCP — Open Source — AI in Development

- Developed a multi-cloud recommendation engine covering compute, storage, databases, networking, and security services using React.js, Node.js, and Docker.
- Currently developing AI-assisted capabilities to analyze application requirements and generate intelligent, optimized cloud infrastructure recommendations.
- Designed the project for community contributions, enabling developers to extend cloud services, recommendation logic, and AI capabilities.

Education

Bachelor of Technology in Computer Science & Engineering

2023 – 2027

Maharashtra Institute of Technology, Aurangabad

Senior Secondary (XII) – Science

2023

Maharashtra Udaygiri Mahavidyalaya, Udgir
